

# Overview of Transportation Planning Process

Prepared for  
Northgate Stakeholders Group  
April 20, 2004

## Agenda

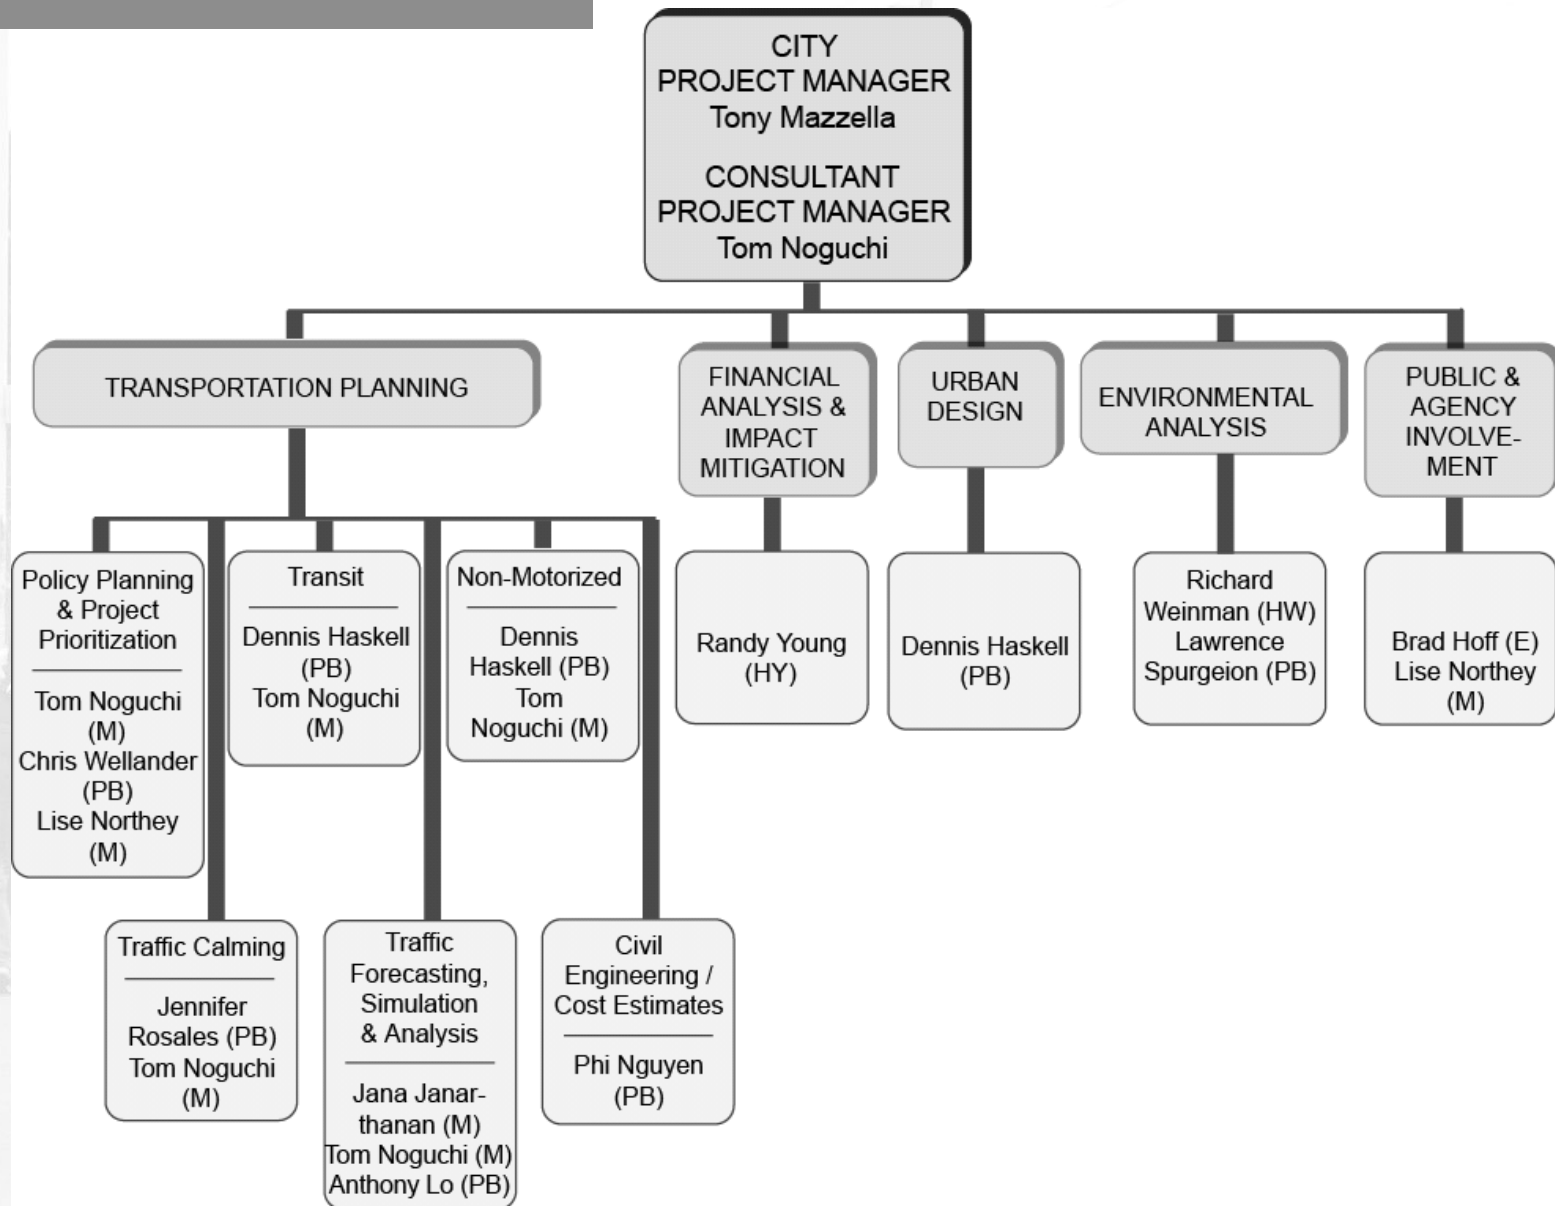

- Introduction
- Transportation planning process
- Questions and answers
- Input to developing guiding principles

# Project Management

- Tony Mazzella, SDOT project manager
  - Direct consultant team's work
  - Coordinate with Stakeholders and other groups
  - Coordinate SDOT's involvement
- Tom Noguchi, consultant team project manager
  - Seek information from public
  - Analyze current and future conditions
  - Identify transportation problems
  - Formulate preliminary recommendations

# The Mirai Team

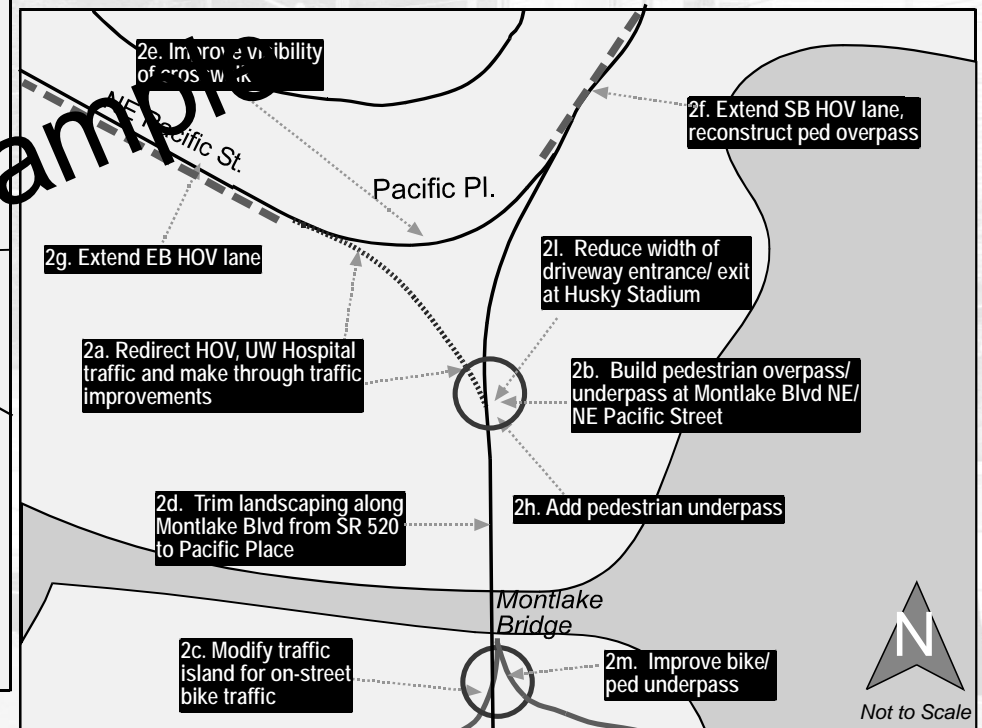

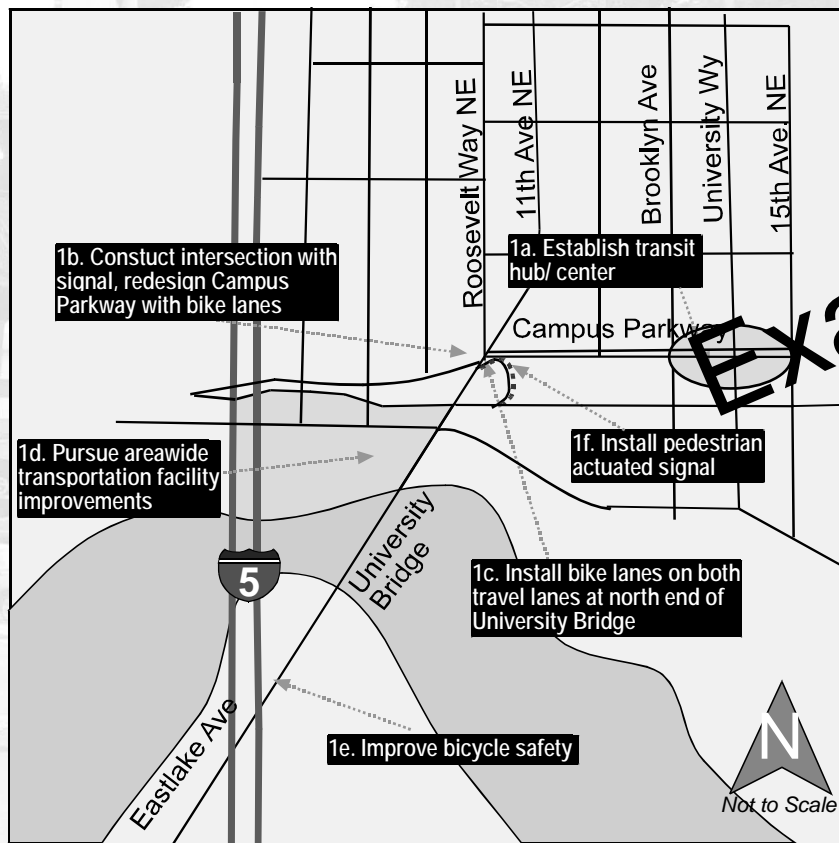

# What is a Transportation Plan?

- Area-wide comprehensive transportation plan includes:
  - Policies
    - Safety, congestion management, mitigation, funding
  - Programs
    - Transportation demand management program, traffic impact mitigation program
  - Capital projects
    - Improvement projects (sidewalks/ re-striping to interchange improvements)
    - Priorities (high to low)
    - Costs

# Example of a CTIP

# Example of a CTIP

## “Early Action” Priority

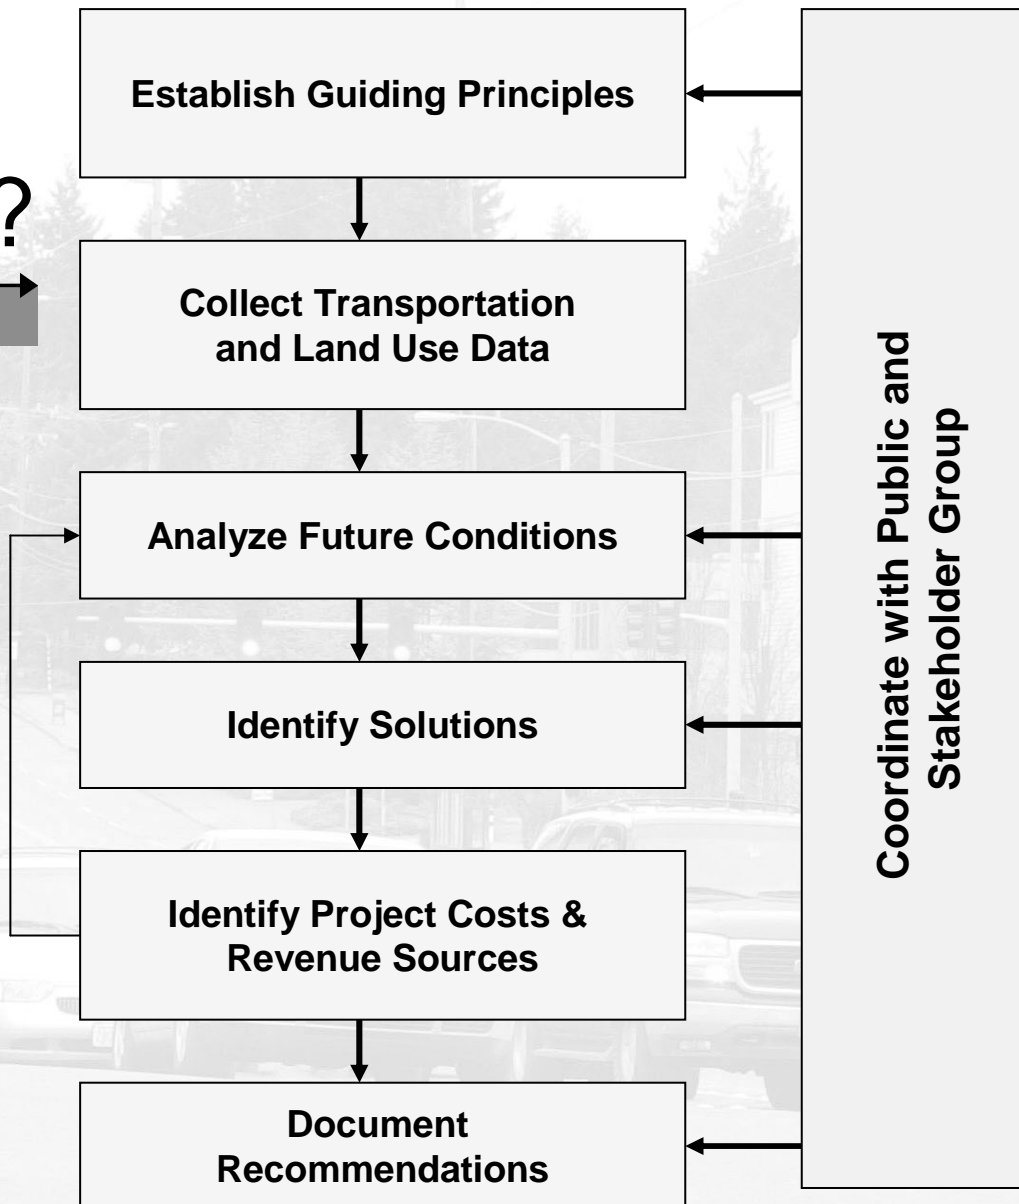

### **Eastlake Avenue E/Campus Parkway/NE 40<sup>th</sup> Street Corridors**

- 
- 1-c Install bike lanes on north and south-bound travel lanes on the north end of the University Bridge.
- 
- 1-e Install ramp for bicyclists to access push button at Eastlake Avenue E/Harvard Avenue E crosswalk.
- 
- 1-h Restrict unregulated parking in the areas around Northlake Way and southwest of UW campus.
- 

### **Montlake Boulevard NE/NE Pacific Street Corridors**

- 
- 2-c Modify traffic island at Montlake Boulevard/NE Shelby Street for on-street bike traffic.
- 
- 2-d Trim landscaping along Montlake Boulevard from SR 520 to Pacific Place NE.

# What Steps Are Needed?

# Guiding Principles

- Establish goals and purposes of CTIP
  - Reaffirm Existing Vision
  - Moving People and Vehicles
- Set general direction
  - Identify study area
  - Set planning horizon
  - Level of traffic congestion
  - Emphasis on use of transit, pedestrian and bike modes
  - Amount of traffic in neighborhoods
  - Types of solutions
  - Financing assumptions

Birds Eye View of Promenade Entry

# Collect Land Use and Transportation Data

- Transportation needs are directly tied to land use changes
  - Land use data:
    - Housing units (multi-family/single family), employment (retail, office, service and others)
    - Pipeline projects (ex. Mall expansion or Lorig development )
  - Transportation data:
    - Traffic volumes, pedestrians and bike counts, accidents, signal operations, traffic lanes, sidewalk and bike lane locations.

# Analyze Future Conditions

- Forecast 10 to 30 year travel demand for vehicles, transit riders, bikes and pedestrians
  - Vehicles: trend analysis and a simulation model
  - Transit: trend analysis and a simulation model
  - Pedestrian and bike: scenario development
- Identify problems

# Analyze Future Conditions

■ Trend analysis

# Analyze Future Conditions

- Forecasting with a model

- 
- Example**
- North  
↑  
*Not to scale*
- NE Ravenna Blvd  
University Way  
7th Ave NE  
20th Ave NE  
22nd Ave NE  
25th Ave NE  
35th Ave NE  
NE 50th St  
NE 45th St  
NE Blakely St  
NE Pacific St  
Eastlake Ave E  
Roosevelt Wy NE  
Brocklyn Ave  
15th Ave NE  
11th Ave NE
- Issues identified:**
- Inadequate facilities to cross I-5
  - Bike, Ped Delays
  - Inadequate bike facilities, lacks trail connection
  - Lack of north-south bike corridor
  - Inadequate sidewalks
  - Inadequate sidewalks
  - Inadequate facilities
  - Burke-Gilman trail/street crossing conflicts
  - Inadequate facilities
  - Inadequate pedestrian facilities
  - Pedestrian/bike/vehicle conflicts, lacks trail connection
  - Lack of easy connections to Burke-Gilman trail
  - Difficult pedestrian crossings
  - Difficult pedestrian crossings
  - Pedestrian/bicycle conflicts
  - Inadequate facilities
- Union Bay  
Portage Bay  
520

# Involve Diverse Stakeholders

- Public Involvement Plan

- Stakeholders
- Targeted Outreach

- Agency Involvement

- City Departments
- Transit Agencies
- State

# Identify Solutions

- Listen to people
- Test unconventional ideas
- Borrow ideas generated elsewhere
  - South Lake Union
  - Univ. Area Trans. Study

*Downtown Kirkland*

# Evaluate Potential Solutions

Projects/Strategies		Enhance Mobility	Improve Safety	Reduce Congestion	Environmental Impacts	Implementation Feasibility	Preliminary Community Support	Planning Level Cost Estimate (in \$000)
<b>1. Eastlake Avenue/Campus Parkway/NE 40<sup>th</sup> Street Corridors</b>								
1-a	Transit Hub/Center on Campus Parkway	✓+	✓	✓	✓	✓--	✓--	\$5,000-\$10,000
1-b	Intersection improvements at Eastlake Ave E and Campus Pkwy	✓++	✓+	✓	✓	✓-	✓+	\$1,200
1-c	Bike lanes on north and south-bound travel lanes on the north end of the University Bridge	✓++	✓++	✓	✓	✓+	✓++	\$10
1-d	Area-wide transportation facility improvements in the Northlake Way area	✓++	✓++	✓	✓	✓-	✓	\$2,400
1-e	Ramp for bicyclists to access pedestrian push button at Eastlake Avenue E/Harvard Avenue E crosswalk	✓+	✓++	✓	✓	✓++	✓+	not estimated
1-f	Pedestrian actuated signal on 11th Ave NE at NE 41st Street	✓++	✓++	✓--	✓	✓++	✓+	\$150
1-g	Bicycle connection from Lower 40th Street to Eastlake Avenue E	✓+	✓	✓	✓	✓--	✓+	\$100
1-h	Parking management in the Northlake Way area	✓+	✓+	✓	✓	✓+	✓	Staff time

# Develop Financial Plan

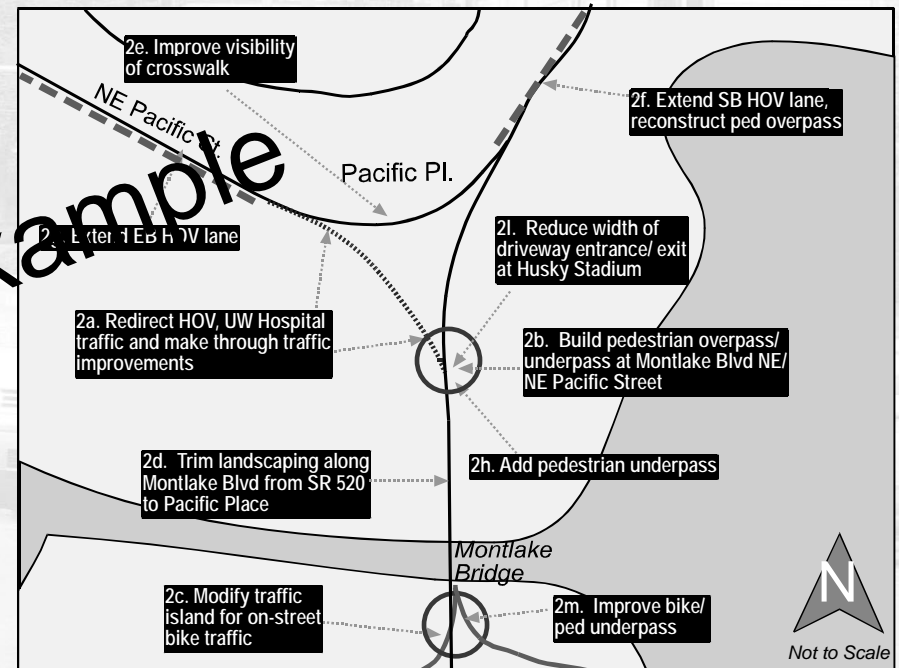

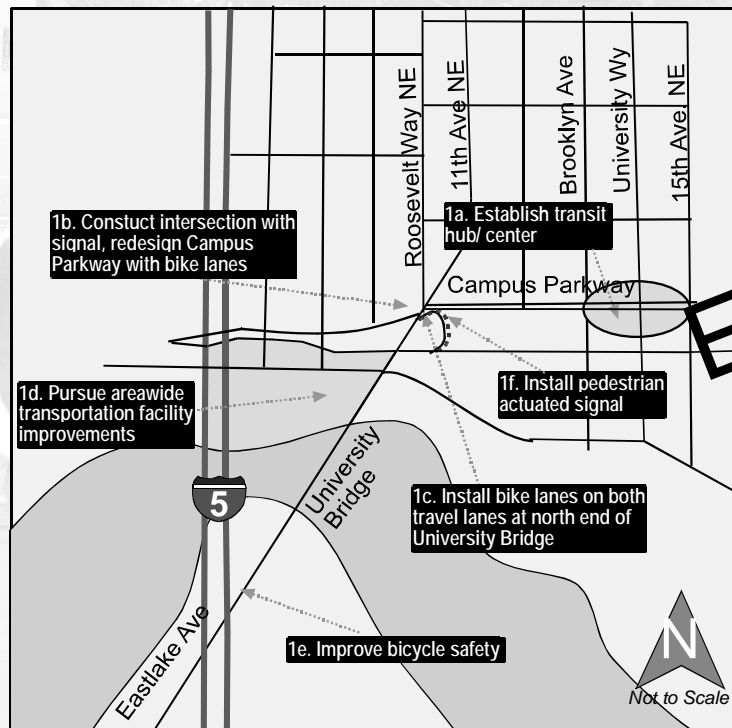

- Planning level cost estimates
- Identify financing options

# Recommendations

- Policies, programs, and capital facilities
- Grouped by priorities

# Questions and Answers
